Central Intelligence Agency

Washington, D. C. 20505

6
April 1987
OCA 87-1405

The Honorable Steny H. Hoyer
U.S. House of Representatives
4351 Garden City Drive
Suite 625
Landover, Maryland 20785

Dear Mr. Hoyer:

STAT This is in response to your letter of 26 February 1987,
enclosing correspondence from your constituent,
[redacted] expressed his concern regarding
alleged substandard construction bolts being used in building
projects currently underway at the Central Intelligence
Agency.

STAT The sample bolt forwarded by [redacted] was provided to
our Office of Logistics (OL). That office conducted a review
to determine whether similar bolts are being used for
structural application within the Agency compound. OL found
that only specified structural steel bolts are being used for
the various construction projects currently underway. Visual
examination of the bolt suggests that it is not meant for use
in structural applications; it appears to be a machine bolt
made of aluminum or another light alloy material. The bolt
does not appear to be counterfeit and could have many
legitimate specialized applications such as in automobiles,
tractors, or ground maintenance vehicles--many of which are
regularly traversing our compound.

STAT We appreciate the concern shown by [redacted]

STAT Sincerely,

[redacted signature]

David D. Gries
Director of Congressional Affairs
